PROFILE

As a software programmer with strong front-end programming skills, I am proficient in developing web experiences that put an emphasis on both functionality and aesthetics. I am proficient in Javascript and Typescript and libraries like ReactJs and React Native. I create web and mobile experiences that balance functionality and aesthetics while emphasizing performance optimization, cross-browser compatibility, and modern UI/UX design. I am expanding my expertise in backend technologies like SQL, PHP and NODE and staying at the forefront of industry trends, including prompt engineering and AI automation, to drive innovation. I have a collaborative attitude and am dedicated to keeping up with industry trends, so I'm always ready to contribute my expertise and creativity to your team's efforts to create exceptional digital experiences. I equally volunteer during my free time to teach kids and young people about pursuing a career in Tech.

- React JS
- React Native
- MySQL
- NextJs
- Javascript
- HTML / CSS
- PHP
- Typescript
- Tailwind
- Expo
- Communication skills
- Public Speaking
- Presentation Skills
- Node JS

EMPLOYMENT HISTORY

Frontend Programmer/AI Researcher (Contracted)

Tekkdose LTd, Bristol

April 2025 -Till date

- Lead frontend development for a fast-paced early-stage startup, overseeing the frontend implementation, code quality, and collaboration among a small agile team (2 frontend devs, 2 backend devs).
- Contributed by leveraging ongoing research in Large Language Models (LLMs), helping shape the technical roadmap and product features for AI centered product prototype.
- Contributed hands-on to core frontend architecture and development tasks as well as collaboration using Github modern frameworks
- Served as a technical voice in strategic discussions, including product planning and investor pitches, particularly focused on articulating the AI/LLM-driven capabilities of the product.

Frontend Developer

CallPhone LTD, Fintech Company, Abuja, Nigeria

February 2023 - February 2024

- Collaborated on code reviews with the product team, acquired insight from senior developers, and improved in writing scalable and custom code.
- Aided in designing and building dashboards to enhance 80% of users' experience on company products
- Ensured that all technical issues were ticketed, response to Tier 1 tickets, and escalation of issues at Tier 2

Frontend programmer (Intern)

THIDELAB, Abuja, Nigeria

June 2022 - Dec 2022

- Worked on a software requirement and Functional requirement document which enabled my team of 10 developers to implement and build the website feature of a whistleblowing platform.
- Conducted user research, which assisted in identifying components which will be implemented in the application.
- Participated in the user interface design process of the aforementioned website with the design team.
- Developed a working web based platform using ReactJs, CSS And NodeJs Framework.
