## PROFILE

Research-oriented Software Engineer with an MSc and experience delivering scalable, maintainable, and user-centred software systems. Proven ability to contribute to both technical delivery and strategic direction, with experience leading development efforts in startup environments and supporting AI-driven product innovation. Strong background in full-stack development, AI-assisted systems, and digital accessibility, with a particular interest in reproducible research, sustainable software engineering, and inclusive design. Passionate about leveraging emerging technologies to solve complex problems and supporting collaborative, multidisciplinary teams through mentorship and knowledge sharing.

## TECHNICAL SKILLS

**Languages:** JavaScript, TypeScript, PHP, SQL, Java

**Frameworks & Tools:** ReactJS, Node.js, Next.js, Expo, Tailwind CSS

**Cloud & Platforms:** AWS, Azure (foundational)

**Practices & Tools:** Git, GitHub, Agile methodologies, WCAG standards

**Core Areas:** Software Architecture & System Design, AI & Prompt Engineering (LLMs), Digital Accessibility & Inclusive Design, Web & Mobile Application Development, Research & Experimental Development.

**Additional Skills:** Communication • Public Speaking • Mentorship • Team Collaboration • Leadership

## PROFESSIONAL EXPERIENCE

### Software Developer / AI Researcher (Contract)

Tekkdose Ltd, Bristol (UK)

*April 2025 – Present*

- Lead development activities within an early-stage startup, overseeing code quality, architecture decisions, and team collaboration in an agile environment.
- Contributed to the design and implementation of AI-driven systems using Large Language Models (LLMs), influencing both product features and long-term technical direction.
- Played a key role in technical strategy discussions, including product planning and investor-facing presentations, articulating system capabilities and scalability.
- Designed and implemented scalable application components while ensuring maintainability, performance, and clean architectural patterns.
- Promoted best practices in collaborative development, version control, and code reviews to improve team efficiency and output quality.

### AI Trainer / Code Reviewer (Part-Time, Remote)

Outlier (US Remote)

*Nov 2024 – July 2025*

- Reviewed and refined LLM-generated code, ensuring adherence to quality, performance, and usability standards.
- Improved code structure, readability, and responsiveness across JavaScript, React, and PHP

implementations.

- Contributed to the development of high-quality training datasets for machine learning applications.
- Documented reusable methodologies and best practices, supporting knowledge transfer and consistency across teams.

---

## Junior Frontend Developer

CallPhone Ltd (Fintech), Abuja, Nigeria

*Feb 2023 – Feb 2024*

1. Collaborated with cross-functional teams to build and optimise user-facing dashboards, improving user experience significantly.
2. Participated in code reviews and iterative development, contributing to scalable and maintainable frontend solutions.
3. Supported issue tracking, debugging, and escalation processes, ensuring efficient resolution of technical challenges.

---

## Software Programmer (Intern)

TIIDELAB, Abuja, Nigeria

*June 2022 – Dec 2022*

- Led a team of 10 developers in translating software and functional requirements into implementation and product development..
- Conducted user research and requirements analysis to inform system design decisions.
- Collaborated with design teams on UI/UX development and contributed to building and deploying a functional web application.

---

## EDUCATION

- MSc Computer Science

Northumbria University, Newcastle, UK

- BSc Human Kinetics and Health Education

University of Port Harcourt, Nigeria

---

## CERTIFICATIONS & MEMBERSHIP

- Professional Member, The Chartered Institute for IT (BCS)
- WCAG Specialist Certification (BCS, 2026)
- Introduction to AI & Machine Learning (2024)

---

## VOLUNTEERING & LEADERSHIP

- Altitude Foundation – Supporting young individuals exploring careers in technology
- Technical Mentor, Studio3 LaunchPad – Guiding developers through projects, code reviews, and career development.
