PROFILE

As a software programmer with strong front-end development skills, specialize in crafting web and mobile experiences that seamlessly combine functionality, performance, and modern aesthetics. My work emphasizes performance optimization, cross-browser compatibility, and intuitive UI/UX design. Expanding backend expertise while staying current with emerging trends in AI automation and prompt engineering. With a collaborative mindset and a passion for innovation,

TECHNICAL SKILLS

- **Languages:** JavaScript, TypeScript, PHP, SQL
 - **Frameworks/Libraries:** ReactJS, React Native, NodeJS, Expo, Tailwind CSS, NextJS, NuxtJS
 - **Tools & Technologies:** Git, GitHub, REDUX, REST APIs
 - **Focus Areas:** Front-End Development, UI/UX Design, Mobile App Development, Backend Development, LLMs /Prompt Engineering
 - **Other Skills:** Public Speaking, Presentation skills, Communication Skills, Team Work, Leadership skills
-

EMPLOYMENT HISTORY

Frontend Programmer/AI Researcher (Contracted)

Tekkdose LTd, Bristol

April 2025 -Till date

- Lead frontend development for a fast-paced early-stage startup, overseeing the frontend implementation, code quality, and collaboration among a small agile team (2 frontend devs, 2 backend devs).
- Contributed by leveraging ongoing research in Large Language Models (LLMs), helping shape the technical roadmap and product features for AI centered product prototype.
- Contributed hands-on to core frontend architecture and development tasks as well as collaboration using Github.
- Served as a technical voice in strategic discussions, including product planning and investor pitches, particularly focused on articulating the AI/LLM-driven capabilities of the product.

AI Trainer Code Reviewer (Part time)

Outlier

Nov 2024 – July 2025

- Reviewed and corrected LLM-generated UI code to meet design and functionality specs.
- Provided feedback to trainers on improving code structure, layout, and responsiveness.
- Identified bugs, improved structure, and enforced clean, optimized code practices.

- Refined code for use in machine learning datasets (JavaScript, React, React Native).
- Documented methodologies and best practices for reuse and team knowledge transfer.

Junior Frontend Developer

CallPhone LTD, Fintech Company, Abuja, Nigeria

February 2023 - February 2024

- Collaborated on code reviews with the product team, acquired insight from senior developers, and improved in writing scalable and custom code.
- Aided in designing and building dashboards to enhance 80% of users' experience on company products
- Ensured that all technical issues were ticketed, response to Tier 1 tickets, and escalation of issues at Tier 2

Frontend programmer (Intern)

THIDELAB, Abuja, Nigeria

June 2022 - Dec 2022

- Worked on a software requirement and Functional requirement document which enabled my team of 10 developers led by me to implement and build the website feature of a whistleblowing platform.
- Conducted user research, which assisted in identifying components which will be implemented in the application.
- Participated in the user interface design process of the aforementioned website with the design team.
- Developed a working web based platform using ReactJs, CSS And NodeJs Framework.

EDUCATION

MSc, Computer Science

Northumbria University, Newcastle.,UK

BSc, Human Kinetics and Health Education

University Of Port Harcourt, Nigeria.

COURSES AND CERTIFICATION

- Certified Prompt Engineering Professional(CPEP) | Udemy 2025
- Information Technology Essentials | Udemy 2021
- Introduction to AI, Machine Learning and Python basics | Udemy 2021

VOLUNTEERING & MENTORSHIP

- Regularly mentor youth to explore careers in technology. (Altitude Foundation)
- Served as mentor to online Technical Bootcamps (Studio3 LaunchPad)
