

# THEODORA N. ORJI

Software Engineer | Full-Stack & AI Systems

+44 7424 346916 | theodoraanneoma@gmail.com | Newcastle, UK | linkedin.com/in/theodora-orji

## PROFILE

Software Engineer with an MSc in Computer Science and hands-on experience building AI-driven products and full-stack web and mobile applications. A strong research background, bringing an analytical, user-centred mindset to software development. Proven track record leading technical delivery in startup environments, contributing to LLM-powered features, and advocating for digital accessibility (WCAG). Actively seeking a mid-level engineering role where technology, inclusion, and impact intersect.

## TECHNICAL SKILLS

**Languages:** JavaScript (ES6+), TypeScript, PHP, SQL, Java

**Frameworks & Libraries:** React.js, Next.js, Node.js, Expo (React Native(foundational)), Tailwind CSS

**AI & LLMs:** AI optimization, LLM Integration, AI Training & Evaluation, Dataset Curation

**Cloud & DevOps:** AWS, Azure (foundational), Git, GitHub, CI/CD workflows

**Practices:** Agile/Scrum, Code Review, WCAG 2.1 Accessibility Standards, System Design

## PROFESSIONAL EXPERIENCE

**Software Developer / AI Researcher** | *Tekkdose Ltd, Bristol, UK* (Contract) *Apr 2025 – Present*

- Lead technical delivery for an early-stage AI startup, owning architecture decisions, code quality standards, and sprint planning across a cross-functional team.
- Designed and shipped LLM-powered product features using prompt engineering and API integration, directly shaping the core AI product roadmap.
- Presented technical capabilities and system scalability to investors, translating complex architecture into clear business value during fundraising discussions.
- Established code review workflows and Git best practices, reducing integration conflicts and improving team velocity.

**AI Trainer / Code Reviewer** | *Outlier (Remote)*, US Remote (Part-Time) *Nov 2024 – Jul 2025*

- Reviewed and improved LLM-generated code across JavaScript, React, and PHP, assessing quality, correctness, and responsiveness against defined rubrics.
- Curated high-quality training data for machine learning pipelines, improving model output quality in targeted code generation tasks.
- Documented reusable evaluation methodologies adopted by the wider review team to maintain consistency at scale.

**Junior Frontend Developer** | *CallPhone Ltd (Fintech)*, Abuja, Nigeria *Feb 2023 – Feb 2024*

- Built and optimised user-facing dashboards for a fintech platform, improving page load performance and streamlining key user flows.
- Participated in regular code reviews and iterative sprints, contributing scalable React components to a shared component library.
- Debugged and resolved frontend issues escalated from support, reducing average resolution time through systematic diagnosis.

### **Software Developer Intern | TIIDELAB, Abuja, Nigeria Jun 2022 – Dec 2022**

- Led a team of 10 developers in translating functional requirements into a deployed web application, coordinating task allocation and delivery milestones.
- Conducted user research and requirements analysis that directly informed system design decisions and UI/UX direction.
- Collaborated with designers on front-end implementation, delivering a functional product within a six-month programme timeline.

## **EDUCATION**

---

### **MSc Computer Science 2023 – 2024**

Northumbria University, Newcastle, UK

### **BSc Human Kinetics and Health Education 2015 – 2019**

University of Port Harcourt, Nigeria

## **CERTIFICATIONS & PROFESSIONAL MEMBERSHIP**

---

- WCAG Specialist Certification — BCS, The Chartered Institute for IT
- Data Privacy, governance and Policy in AI Certification — BCS, The Chartered Institute for IT
- Professional Member — BCS, The Chartered Institute for IT
- Introduction to AI & Machine Learning – Udemy
- Certified Prompt Engineering – Udemy

## **VOLUNTEERING & LEADERSHIP**

---

- Technical Mentor, Studio3 LaunchPad — Guiding early-career developers through projects, code reviews, and career planning.
- Volunteer, Altitude Foundation — Supporting young people exploring pathways into technology careers.
- Technical Trainer, Tekk Lab – Bridging the gap between product and engineering for aspiring AI product managers, covering real-world developer practices, team dynamics, and responsible AI governance frameworks.
